

ACTIONS & AMBITIONS PLANNER: Week 7

What are my longer term steps?

- Pray and consider what does creation care mean for me and my family longer term? How can we act now and keep acting?
 - Pray for people facing and already in extreme poverty where the pandemic, climate change and energy transitions may or already has impacted their livelihoods and health
 - We have offered suggestions about a variety of climate crisis related projects, pray about how and which project you may want to give time or money towards
 - Keep learning and growing your mindset, regularly review the Saying Yes To Life Resources (<https://spckpublishing.co.uk/saying-yes-resources>) to find more resources on the topics that touched your heart and spoke to you in particular.
 - Maybe you have listened to this sermon series and God and believe now is the time for you to remove your mask, shine your personal lamp and practise vulnerability by really acting with purpose and using your voice on matters that are deeply important to you – caring for God's creation. Is this time to become an authentic thought leader in your team at work or at church and help lead people in a more sustainable direction or find allies to help you create a sustainability-based project or fundraiser?
-
